Titanic: A Fresh Look at the Evidence by a Former Chief Inspector of Marine Accidents John Lang
The sinking of the *Titanic* on her maiden voyage in April 1912 was one of the defining moments of the twentieth century. Books and films about the disaster that befell the iconic liner are commonplace, and it seems almost inconceivable that anything fresh can emerge. But there is one angle that has not been covered, and *Titanic Revisited* examines the events of April 1912 from that completely new perspective. John Lang brings the standards of a twenty-first-century accident investigation to bear on the events of April 1912, using his expertise and his investigator's instinct to determine exactly what happened a century ago, and what important lessons still need to be learned.
