Advances in Immunology: 61

Advances in Immunology: 61

"The series which all immunologists need."

--The Pharmaceutical Journal

"Advances in Immunology must find itself among the most active volumes in the libraries of our universities and institutions."

--Science

"Deserves a permanent place in biomedical libraries as an aid in research and in teaching"

--Journal of Immunological Methods

"A provocative and scholarly review of research"

--Journal of the American Medical Association

"Provides an extremely valuable source of reference and many stimulating ideas...the main repository of information in a rapidly developing subject"

--The Lancet

"Provides unrivalled value in both academic and fiscal terms and should be purchased by hard pressed librarians as a major priority to be jealously defended."

--Journal of Medical Microbiology

"A very valuable serial publication...no serious student of immunology can afford to be without it."

--Archives of Biochemistry and Biophysics

Key Features

- * Focus on components of the V(D)J recombination machinery that might be related to diseases in humans and animals
- * Control of the complement system by control of C3/C5 convertase on host cells, control of fluid phase C3/C5 convertases, control of fluid phase MAC, and control of deposited MAC
- * Immunodeficiency resulting from a complete absence of MHC class II expression and two trans-acting factors controlling transcription
- * Current knowledge of IL-2R signaling, highlighting IL-2 signaling, and T-cell growth regulation
- * Functional role of CD40 in cells, the *in vivo* significance of CD40-CD40-L interactions, and the signal transduction machinery activated following crosslinking of the CD40 antigen
- * Integrative approach to better understand the observed heterogeneity of an individual response to allergens
- * Regulation of isotype specificity, switch recombination regulation, and the mechanism of switching
- * Two lymphocyte-specific proteins, RAG1 and RAG2, initiate V(D)J recombination of antigen receptor genes
