True32 Flow Manufacturing Bob Buckley

Description: When we start a cabinet shop, we become managers, whether we like it or not. We must manage all of our resources. Your employees will work under any system you set up. There will be little or no concern on the shop floor whether the best method is being used or whether the best results are being achieved, whether the material and motion of men are being optimized. You cannot bring in a group of new machines and expect them to produce an unending supply of money if your management systems are not in place and working beforehand. Our objective is to supply the systems to make panel processing machinery work for you in the most efficient way possible.
