High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems)

High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems)

"This comprehensive collection of papers offers you practical information that can be used to develop high-performance digital system design. Specially written introductions by editor Vojin G. Oklobdzija precede each chapter to aid your understanding of the most relevant topics in this advanced area of circuit design.

Featured topics include:

- * Differential pass-transistor logic
- * High-speed circuits and design of high-performance systems
- * Advanced deep submicron circuits used in high-speed computers and digital circuits
- * Clocking and latch design essential to high-performance systems
- * Relationships between VLSI algorithms and implementation techniques

HIGH PERFORMANCE SYSTEM DESIGN: Circuits and Logic is indispensable reading for circuit designers, practicing engineers, and students who want to master the basic principles underlying high-performance system design. This handy, single volume provides a useful reference to a collection of accumulated experience necessary for good, successful designs.

Professors: To request an examination copy simply e-mail collegeadoption@ieee.org."

From reader reviews:

Edward Florez:

The knowledge that you get from High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems) could be the more deep you rooting the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to comprehend but High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems) giving you enjoyment feeling of reading. The writer conveys their point in certain way that can be understood by means of anyone who read it because the author of this book is well-known enough. That book also makes your vocabulary increase well. So it is easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this particular High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems) instantly.

Mac Cutter:

Spent a free time and energy to be fun activity to try and do! A lot of people spent their down time with their family, or all their friends. Usually they doing activity like watching television, likely to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own personal free time/ holiday? Can be reading a book might be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the publication untitled High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems) can be fine book to read. May be it may be best activity to you.

Janice Wilson:

A lot of book has printed but it differs. You can get it by internet on social media. You can choose the very best book for you, science, comedy, novel, or whatever through searching from it. It is named of book High-Performance System Design: Circuits and Logic (IEEE Press Series on Microelectronic Systems). Contain your knowledge by it. Without causing the printed book, it can add your knowledge and make anyone happier to read. It is most crucial that, you must aware about book. It can bring you from one location to other place.

Betty Callahan:

Reading a book make you to get more knowledge from that. You can take knowledge and information from the book. Book is prepared or printed or descriptive from each source that will filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just trying to find the High-Performance System Design: Circuits and Logic (IEEE Press Series on

Microelectronic Systems) when you essential it?
