Bildung von Innovationsclustern anhand der Technologie Wind (German Edition)

Thomas Burger

Bildung von Innovationsclustern anhand der Technologie Wind (German Edition) Thomas Burger
Studienarbeit aus dem Jahr 2006 im Fachbereich BWL - Unternehmensführung, Management, Organisation, Note: 2,0, Universität Hohenheim (Internationales Management und Innovation), Veranstaltung: Energiepolitisches Seminar, 20 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Ziel der Arbeit ist es die Bildung von Innovationsclustern in Deutschland anhand der Technologie Wind darzustellen. Hierfür werden nach einer theoretischen Einführung die Entwicklung des deutschen Windenergiemarktes sowie Fördermöglichkeiten dargestellt, bevor die empirische Realität von Innovationsclustern analysiert wird. Die Arbeit gliedert sich hierfür in drei Abschnitte.
Im ersten Abschnitt werden neben theoretischen Grundlagen bezüglich Innovationen auch die Theorie der Clusterbildung und die Bildung von Innovationsclustern dargestellt. Der zweite Abschnitt konzentriert sich auf die Beschreibung der Performance des Windenergiemarktes in Deutschland. Im Besonderen werden die am Marktanteil gemessen stärksten Firmen vorgestellt und deren Entwicklung aufgezeigt. Nach einer Darstellung der unterschiedlichen Fördermodelle innerhalb der Europäischen Union (EU) und des Erneuerbaren-Energien-Gesetzes (EEG) in Deutschland werden diese auf Anreize zur Clusterbildung und Innovation bewertet und analysiert. Abschnitt drei stellt letztendlich die empirische Realität von Innovationsclustern im deutschen Windenergiemarkt dar.
