Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 Committee on Acute Exposure Guideline Levels, Committee on Toxicology, Board on Environmental Studies and Toxicology, Division on Earth and Life Studies, National Research Council

Extremely hazardous substances (EHSs) can be released accidentally as a result of result of chemical spills, industrial explosions, fires, or accidents involving railroad cars and trucks transporting EHSs. Workers and residents in communities surrounding industrial facilities where EHSs are manufactured, used, or stored and in communities along the nation's railways and highways are potentially at risk of being exposed to airborne EHSs during accidental releases or intentional releases by terrorists. Pursuant to the Superfund Amendments and Reauthorization Act of 1986, the U.S. Environmental Protection Agency (EPA) has identified approximately 400 EHSs on the basis of acute lethality data in rodents.

As part of its efforts to develop acute exposure guideline levels for EHSs, EPA and the Agency for Toxic Substances and Disease Registry (ATSDR) in 1991 requested that the National Research Council (NRC) develop guidelines for establishing such levels. In response to that request, the NRC published *Guidelines for Developing Community Emergency Exposure Levels for Hazardous Substances* in 1993. Subsequently, *Standard Operating Procedures for Developing Acute Exposure Guideline Levels for Hazardous Substances* was published in 2001, providing updated procedures, methodologies, and other guidelines used by the National Advisory Committee (NAC) on Acute Exposure Guideline Levels for Hazardous Substances and the Committee on Acute Exposure Guideline Levels (AEGLs) in developing the AEGL values.

Using the 1993 and 2001 NRC guidelines reports, the NAC—consisting of members from EPA, the Department of Defense (DOD), the Department of Energy (DOE), the Department of Transportation (DOT), other federal and state governments, the chemical industry, academia, and other organizations from the private sector—has developed AEGLs for more than 270 EHSs. In 1998, EPA and DOD requested that the NRC independently review the AEGLs developed by NAC. In response to that request, the NRC organized within its Committee on Toxicology (COT) the Committee on Acute Exposure Guideline Levels, which prepared this report. This report is the fourteenth volume in that series. *Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14* summarizes the committee's conclusions and recommendations.

From reader reviews:

Florence Whitney:

Reading a guide can be one of a lot of task that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new details. When you read a guide you will get new information mainly because book is one of various ways to share the information or maybe their idea. Second, reading a book will make you actually more imaginative. When you reading through a book especially fictional works book the author will bring you to imagine the story how the people do it anything. Third, you can share your knowledge to other folks. When you read this Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14, you are able to tells your family, friends as well as soon about yours book. Your knowledge can inspire the others, make them reading a publication.

Tawny Morgenstern:

Spent a free time to be fun activity to do! A lot of people spent their leisure time with their family, or all their friends. Usually they performing activity like watching television, likely to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? May be reading a book can be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 can be very good book to read. May be it could be best activity to you.

Jose Wilson:

Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 can be one of your basic books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to place every word into satisfaction arrangement in writing Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 but doesn't forget the main stage, giving the reader the hottest and also based confirm resource information that maybe you can be one of it. This great information can easily drawn you into completely new stage of crucial thinking.

Jose Crawford:

That guide can make you to feel relax. This particular book Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 was colorful and of course has pictures on the website. As we know that book Acute Exposure Guideline Levels for Selected Airborne Chemicals: Volume 14 has many kinds or type. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think you are the character on there. Therefore , not at all of book usually are make you bored, any it

makes you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading that.
