Post-Parametric Automation in Design and Construction

Alfredo Andia, Thomas Spiegelhalter

Post-Parametric Automation in Design and Construction Alfredo Andia, Thomas Spiegelhalter
Automation, a mixture of algorithms, robots, software, and avatars, is transforming all types of jobs and industries. This book responds to one critical question for the design and construction industry: “how are architects, engineers, and contractors using information technology to further automate their practices?”

Addressing the use of new digital technologies, particularly parametric automation for design and construction in the building industry, this book looks at how technologically advanced architectural and engineering practices are semi-automating their design processes by using sophisticated algorithms to transform their workflows. The book also documents a set of firms that are further advancing automation by using pre-fabrication, modularization, and custom designs via robotics.

From reader reviews:

Mark Sawyers:

Reading can called thoughts hangout, why? Because if you find yourself reading a book specially book entitled Post-Parametric Automation in Design and Construction the mind will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely will become your mind friends. Imaging each word written in a guide then become one application form conclusion and explanation in which maybe you never get before. The Post-Parametric Automation in Design and Construction giving you one more experience more than blown away your thoughts but also giving you useful info for your better life in this particular era. So now let us show you the relaxing pattern this is your body and mind will likely be pleased when you are finished reading through it, like winning a. Do you want to try this extraordinary paying spare time activity?

Jack Johnson:

This Post-Parametric Automation in Design and Construction is great guide for you because the content that is certainly full of information for you who always deal with world and have to make decision every minute. That book reveal it facts accurately using great manage word or we can point out no rambling sentences included. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but difficult core information with splendid delivering sentences. Having Post-Parametric Automation in Design and Construction in your hand like having the world in your arm, info in it is not ridiculous one. We can say that no publication that offer you world with ten or fifteen moment right but this book already do that. So , it is good reading book. Hey Mr. and Mrs. active do you still doubt that will?

Ida Johnson:

You are able to spend your free time to read this book this e-book. This Post-Parametric Automation in Design and Construction is simple bringing you can read it in the area, in the beach, train and also soon. If you did not possess much space to bring typically the printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

William Powers:

Don't be worry should you be afraid that this book will probably filled the space in your house, you could have it in e-book way, more simple and reachable. That Post-Parametric Automation in Design and Construction can give you a lot of buddies because by you investigating this one book you have point that they don't and make an individual more like an interesting person. This kind of book can be one of one step for you to get success. This publication offer you information that probably your friend doesn't recognize, by knowing more than different make you to be great individuals. So , why hesitate? Let's have Post-Parametric

Automation in Design and Construction.
