Delaware and Hudson Railway (Images of Rail) Marilyn E. Dufresne

The Delaware and Hudson Railway has a grand and glorious history that began in the coal mines of Pennsylvania. The Delaware and Hudson Canal; Gravity Railroad; the Stourbridge Lion, the first locomotive in America in 1829; and the Albany and Susquehanna Railroad provided the necessary stepping stones for successfully transporting anthracite by rail to New York State. In 1906, the massive roundhouse was built in Oneonta during the glory days of steam power, and in 1931 the company became known as the Delaware and Hudson Railway. Today the railroad serves as a "bridge line," providing an important link in moving heavy freight. Delaware and Hudson Railway enlightens rail fans with historic photographs and rekindles the nostalgia for the great railroad era.
