System Simulation Techniques with MATLAB and Simulink

Dingyü Xue, YangQuan Chen

System Simulation Techniques with MATLAB and Simulink Dingyü Xue, YangQuan Chen
System Simulation Techniques with MATLAB and Simulink comprehensively explains how to use MATLAB and Simulink to perform dynamic systems simulation tasks for engineering and non-engineering applications.

This book begins with covering the fundamentals of MATLAB programming and applications, and the solutions to different mathematical problems in simulation. The fundamentals of Simulink modelling and simulation are then presented, followed by coverage of intermediate level modelling skills and more advanced techniques in Simulink modelling and applications.

Finally the modelling and simulation of engineering and non-engineering systems are presented. The areas covered include electrical, electronic systems, mechanical systems, pharmacokinetic systems, video and image processing systems and discrete event systems. Hardware-in-the-loop simulation and real-time application are also discussed.

Key features:

- Progressive building of simulation skills using Simulink, from basics through to advanced levels, with illustrations and examples
- Wide coverage of simulation topics of applications from engineering to non-engineering systems
- Dedicated chapter on hardware-in-the-loop simulation and real time control
- End of chapter exercises
- A companion website hosting a solution manual and powerpoint slides

System Simulation Techniques with MATLAB and Simulink is a suitable textbook for senior undergraduate/postgraduate courses covering modelling and simulation, and is also an ideal reference for researchers and practitioners in industry.

From reader reviews:

Margaret Chambers:

Hey guys, do you would like to finds a new book to study? May be the book with the headline System Simulation Techniques with MATLAB and Simulink suitable to you? Typically the book was written by renowned writer in this era. The particular book untitled System Simulation Techniques with MATLAB and Simulinkis the one of several books that everyone read now. This book was inspired many men and women in the world. When you read this publication you will enter the new way of measuring that you ever know just before. The author explained their concept in the simple way, so all of people can easily to be aware of the core of this e-book. This book will give you a great deal of information about this world now. In order to see the represented of the world on this book.

Rocio Linville:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Along with book everyone in this world may share their idea. Publications can also inspire a lot of people. Lots of author can inspire their very own reader with their story or maybe their experience. Not only the storyline that share in the publications. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write on their book. One of them is this System Simulation Techniques with MATLAB and Simulink.

Ida Acord:

The actual book System Simulation Techniques with MATLAB and Simulink has a lot associated with on it. So when you check out this book you can get a lot of help. The book was written by the very famous author. The author makes some research just before write this book. This book very easy to read you can obtain the point easily after reading this book.

Alberto Kimble:

Is it a person who having spare time and then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This System Simulation Techniques with MATLAB and Simulink can be the answer, oh how comes? The new book you know. You are consequently out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these books have than the others?
