Excerpt from The Carpenters Steel Square, and Its Uses: Being a Description of the Square, and Its Uses in Obtaining the Lengths and Bevels of All Kinds of Rafters, Hips, Groins, Braces, Brackets, Purlings, Collar-Beams, and Jack-Rafters

The rapid disposal of the first edition of the "Steel Square and Its Uses," has rendered it incumbent for the publisher to issue a second and larger edition; and recognizing this condition, in connection with the fact that the work has met with more than a passing favor from those who make daily use of the Steel Square, it has been deemed necessary to make the present edition more useful by adding a number of solutions of mechanical problems by aid of the instrument, and other matters that will render the work more valuable to the operative mechanic.

The Author has reason to, and does, feel pleased at the appreciation the working mechanics of this country have evinced for this work; and is assured, by the numerous letters, and other indications of good feeling he has received on all hands, that the present enlargement of the work has not been made unnecessarily or too soon.

Feeling confident that the additions to the present edition will commend themselves to the toiling thousands who have daily use for the "Steel Square," the publishers send the enlarged work out to the public with a knowledge that it will be welcomed by those who are most interested in the subject of which it treats.
