Rendering High Dynamic Range (HDR) scenes on media with limited dynamic range began in the Renaissance whereby painters, then photographers, learned to use low-range spatial techniques to synthesize appearances, rather than to reproduce accurately the light from scenes. *The Art and Science of HDR Imaging* presents a unique scientific HDR approach derived from artists' understanding of painting, emphasizing spatial information in electronic imaging.

Human visual appearance and reproduction rendition of the HDR world requires spatial-image processing to overcome the veiling glare limits of optical imaging, in eyes and in cameras. Illustrated in full colour throughout, including examples of fine-art paintings, HDR photography, and multiple exposure scenes; this book uses techniques to study the HDR properties of entire scenes, and measures the range of light of scenes and the range that cameras capture. It describes how electronic image processing has been used to render HDR scenes since 1967, and examines the great variety of HDR algorithms used today. Showing how spatial processes can mimic vision, and render scenes as artists do, the book also:

- Gives the history of HDR from artists' spatial techniques to scientific image processing
- Measures and describes the limits of HDR scenes, HDR camera images, and the range of HDR appearances
- Offers a unique review of the entire family of Retinex image processing algorithms
- Describes the considerable overlap of HDR and Color Constancy: two sides of the same coin
- Explains the advantages of algorithms that replicate human vision in the processing of HDR scenes
- Provides extensive data to test algorithms and models of vision on an accompanying website www.wiley.com/go/mccannhdr

#### From reader reviews:

#### **Andre Rosier:**

What do you with regards to book? It is not important along? Or just adding material when you need something to explain what yours problem? How about your time? Or are you busy person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have extra time? What did you do? Every person has many questions above. They must answer that question simply because just their can do which. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this kind of The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) to read.

#### Dana Richardson:

Hey guys, do you desires to finds a new book to learn? May be the book with the name The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) suitable to you? The particular book was written by famous writer in this era. The book untitled The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) is the main one of several books that will everyone read now. This particular book was inspired many men and women in the world. When you read this reserve you will enter the new shape that you ever know before. The author explained their plan in the simple way, consequently all of people can easily to comprehend the core of this e-book. This book will give you a lots of information about this world now. So you can see the represented of the world within this book.

#### **Jason Young:**

Do you like reading a guide? Confuse to looking for your chosen book? Or your book seemed to be rare? Why so many question for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book and also novel and The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) or maybe others sources were given knowledge for you. After you know how the truly amazing a book, you feel would like to read more and more. Science reserve was created for teacher as well as students especially. Those textbooks are helping them to put their knowledge. In other case, beside science reserve, any other book likes The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) to make your spare time far more colorful. Many types of book like this.

#### Michael Wheeler:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just small students that has reading's internal or real their pastime. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that reading through is not important, boring as well as can't see

colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So, this The Art and Science of HDR Imaging (The Wiley-IS&T Series in Imaging Science and Technology) can make you really feel more interested to read.
